Dan,

Matt called me last night about this release. Between DEQ and the locals, it appears that they were managing the situation without the need for assistance. It may be worth checking in with DEQ to see if there are any follow-up issues. However, given the nature of the release and quantity of toxic chemicals used or stored at the site, it appears that our Prevention Programs should be on point for this issue. I copied Suzanne and Javier with this message, as well as Kelly for perhaps other enforcement/inspection programs.
